PROFESSIONAL EXPERIENCE

Mid-Level Fullstack Developer @ Deep – On-site

APRIL, 2025 - PRESENT

Responsible for developing complete web systems using modern PHP and the Laravel ecosystem. Experienced in building large-scale data analysis solutions, creating REST APIs, and integrating external services. Skilled in database modeling and optimization, including high-performance SQL queries. Develop user interfaces with HTML, CSS, and JavaScript, as well as interactive dashboards for data visualization. Apply clean code practices, security standards, and performance optimizations to ensure scalability, maintainability, and efficient system integration.

Fullstack Developer @ Nulog Logística – On-site

JUNE, 2023 – OCTOBER, 2024

At Nulog, I created and maintained the corporate website, designing it in Figma and implementing the front-end with Next.js, TypeScript, and Tailwind. I built an API for login and data submission using Node.js and MongoDB. I configured development and deployment environments with Docker and automated processes with GitHub Actions. I also develop task automation applications with Python, using libraries like Selenium and Pandas.

Front–End Developer @ Galory's - Remote

JULY, 2022 – MARCH, 2023

At Galory's, I worked as a front-end developer, designing interfaces in Figma and building the front-end. I maintained existing projects and participated in creating new ones. I used HTML, CSS, SASS, JavaScript, PHP, React, TypeScript, and Styled Components.

Front–End Developer @ Tictur - Remote

MARCH, 2022 – JULY, 2022

At Tictur, I provided maintenance and development services for new pages on the platform dashboard. I used HTML, CSS, JavaScript, and PHP, and integrated and consumed APIs to enhance functionality and user and admin experience.

TECNOLOGIES

JavaScript
TypeScript
